

SMARTSTOCK

COMPLETE INVENTORY & ASSET MANAGEMENT SOLUTIONS

REXEL

a world of energy

Take back control of your inventory management

Rexel's Smart Stock Solutions are cloud-based inventory and asset management systems powered by market-leading technology. Fully automated, they provide you with flexible and scalable solutions where you need:

- Security
- Stock availability
- Real-time inventory control
- Supply chain management
- Exception monitoring
- Asset management and much more.

Our expert team will provide you with all the advice you need to select the right solution for your business and guide you through the process from set-up to mobilisation to ensure you enjoy the best possible return on your investment.

Automated syncing

All SmartStock solutions are linked to Rexel cloud-based software which means you can access reports and management information anywhere, any time via the internet.

Efficiency & Productivity

Streamlining your inventory with our innovative Inventory Management Solutions will significantly improve your efficiency and productivity. Eliminating manual processes allows you time to focus on other areas of your business.

Options to fit your business needs

SmartStores

Static site?

Our SmartStores solution enables you to effectively manage and control usage of inventory and assets in a storeroom environment.

SmartVan

On the move?

SmartVan is an app based fleet inventory and asset management solution. It reduces the number of visits to suppliers

SmartVend

Quick essentials access?

Our SmartVend solutions puts the right item in the right place at the right time, ensuring optimum productivity while preventing work stoppages and controlling costs.

Adding value to stock solutions

Improving Efficiencies

- Eliminates unnecessary trips to suppliers
- Increases first time fix rates
- Delivers immediate and accurate visibility of inventory levels
- Reduces/eliminates the need for manual intervention in stock processes

Working Smarter

- Full inventory and asset management
- Allocates material costs to jobs
- Cost accounting by multiple user defined cost centres
- Increases accuracy control through real time reporting of stock levels
- Improves invoice accuracy

Decreasing Costs

- Reduces wastage, theft and redundant stock
- Reduces queue time
- Data entry reduction through automatic reordering from supplier
- Increased compliance where supplier agreements are in place
- Analysis proven to reduce costs by an average of 25%

Socially Distanced

- Less interaction with third parties via deliveries and collections
- Contactless collections and deliveries

Storeroom management solution

SmartStores is an enterprise level storeroom management solution enabling you to effectively manage and control usage of material in a storeroom environment. It provides real time enterprise wide visibility and control over your materials to make sure that you are getting the most out of your investment.

Are you getting the most out of your indirect materials investment?

Most organisations have limited visibility of indirect materials used in their operation

Inventory is often stored in multiple untracked locations, usage is not adequately controlled and replenishments are performed in a reactive, haphazard fashion. This leads to excessive spend/overconsumption of some materials, and shortages and expediting of other inventory, which in turn results in an increased risk of costly production downtime.

SmartStores works as a manned or unmanned storeroom management solution and offers fast issuance and re-stock of items. It is a multi supplier and multi language automated re-ordering solution for every store and vending facility across your organisation.

Manage and control usage of material in a storeroom environment

Two way communication

Low touch NFC RFID solution that is quick and easy to use and allows two way communication.

Track users and items

 Complete audit log of all material usage. Control material issues/returns to and from specific users.

Enterprise-wide reporting

Easily access data and enterprise-wide reports across multiple sites/departments/stocking locations.

Dynamic Project Management

 Job costing with job numbers automatically updating SmartStores centrally from the Rexel platform.

Real time notifications

Enabling complete control of all solutions, user access, products and reports. Real time monitoring offers error free data and an automated process.

Complete control

 Ability to generate and overwrite product codes present in the database on the Rexel NFC tags via the password protected SmartStores App.

How our storeroom management solution works

The SmartStores solution enables customers to effectively manage and control usage of material in a storeroom environment.

Download App

Download the SmartStores App to either an Android smart device with NFC RFID capability. The SmartStores App also works with product barcodes.

Link to Rexel Platform

Link the SmartStores App to the Rexel platform.

Stores setup

Stores bin locations are smart tagged for scanning.

Products sourced

Rexel delivers products to meet the initial stores quantities.

Auto updating and reordering

Items are replenished automatically once re-order levels reached.

Fulfilment orders generated

Fulfilment orders are generated and sent to Rexel via the platform.

NFC Technology

NFC stands for Near Field Communication. It's how smart phones can interact with something in close proximity to provide a wireless connection between your device and another. This allows two-way communication, between the devices to enable them to send and receive information.

SmartVan
Stock on the move

Fleet inventory management solution

The SmartVan App is a fleet inventory management solution that enables you to effectively manage and control usage of indirect material on vans. SmartVan offers real time inventory usage by user or job, ability to assign products to job numbers, multi supplier stock and auto re-ordering through the platform via NFC tags.

Reduced time at trade counters and increased 'first time fix' capability

Implementing Rexel's SmartVan management is one of the easiest ways to achieve a high level of savings.

Operators will no longer need to take orders into a supplier and wait while they are served and the parts picked.

SmartVan is an automated solution that monitors parts as they are used - this generates a replenishment order which is automatically picked and put into a replenishment bucket for that van - whenever the operative accepts a delivery or calls at the local branch they receive precisely what they need.

Company reporting and complete control across your van fleet

-  **Real-time inventory management**
Linked to Rexel cloud-based software, which can be accessed anywhere, anytime providing access to reports and real-time management information.
-  **SUPPLIER INTEGRATION**
Materials used and ordered are sent straight to Rexel electronically including the branch location for collection. Auto re-order through link to the Rexel platform.
-  **Real time stock data**
View stock balances per van at any time online, analyse slow-moving parts and parts ordered regularly - also search for specials. Issue assets via the app using NFC tags.
-  **Increase productivity**
Track your equipment and ensure it is returned to the correct location or van. Save time and increase information accuracy by counting a few items at the start and end of each day.
-  **Dynamic Project Management**
Assign products to job numbers via the app. Job Costing with job numbers automatically updating the App centrally from the Rexel platform.
-  **Auto-Replenishment**
24/7 visibility, availability, control and accountability. Items are automatically re-ordered as they are booked on to jobs ensuring vans don't run out of stock, freeing up time to complete more jobs.

How our fleet inventory management solution works

This enterprise-wide materials management platform turns your van fleet into mobile stores.

PIN entered

The users' PIN number determines that individual's user rights as SmartVan App reconfigures itself each time a new PIN is entered.

NFC scanned

The user simply taps the phone against the NFC tagged product bin - this creates the pick list of items and allows the user to enter quantities required.

Job codes used

When job codes are used - SmartVan will prevent items being issued unless a job code has been selected.

List completed

When the list is complete the user ends the transaction by tapping 'Confirm Items Issued'.

Access functionality

Engineers have the ability to issue, return and restock items. Superusers also have the ability to manage tags and perform maintenance functions.

SmartVend

Quick essentials access

Vending inventory management solution

Increasing accessibility for stores teams can improve best practice and productivity. We work closely with you to develop bespoke vending solutions that suit your business requirements.

Rexel provides scalable and cost-effective industrial vending solutions for the secure management of a wide range of high and low usage items.

Automated, accountable and high availability vending

Point-of-use access vending, can help increase productivity, decrease costs and streamline processes.

Our vending machines were built specifically with the working environment in mind and can be stocked with all kinds of inventory. One solution does not fit all; there are several vending options available to you to meet your unique storage needs, drive productivity and greatly improve how your business operates.

Security is paramount

Our platform offers customers high level security protection from external attacks, privilege abuse and, data and product loss for all vending applications – giving you total peace of mind.

Full Scalability

One of the most powerful benefits of our vending solutions is scalability. Rexel vending can rapidly respond to meet new demands – either in size or volume – without significantly affecting the service level.

Business Critical Analytics

Our vending solutions use innovative demand-based ordering technology. Improving inventory management, they keep track of usage patterns, trace in-house production material and tooling, etc.

Reduction of Costs

Rexel vending will save you money. Programmed to automatically dispense stock and control limits, these machines are optimised to avoid over-consumption and waste, minimising downtime.

Increased Productivity

Provides 24/7 access making your products and components always available to employees delivering optimum productivity by always having access to the right item at the right time.
